- **Platform & Tools** : Visual Studio Code, Git, GitHub
- **Hosting Platform** : Firebase , Vercel , Netlify

WORK EXPERIENCE

Software Developer

03/2024 - Current

At Atum Information Technologies

- Collaborated with senior developers to create many user-friendly web interfaces using React and Typescript.
- Gained 2 years of experience working with RESTful APIs to integrate dynamic data into web applications.
- Converted design mockups into functional web pages, ensuring a consistent and responsive user experience.
- Researched and shared insights on emerging web technologies and trends, contributing to team knowledge and project improvements.
- Implemented authentication and authorization flows using Firebase / Auth0 / JWT.

Junior Software Developer

03/2023 - 03/2024

At Bioclutch Scientific Private Ltd

- Contributed to the development of a responsive company website, enhancing mobile compatibility and user experience.
- Worked on API integration and developed functionality for sysytem using APIs
- Improved website performance by implementing lazy loading, code splitting, and image optimization.
- Participated in code reviews, gaining experience in best coding practices.

PROJECTS

Healthcare Web App (React, Tailwind CSS, Firebase)

- The website adapts well to various screen sizes, ensuring accessibility across devices like desktops, tablets, and smartphones.
- The platform offers tools to monitor health-related data, which can be a valuable resource for users seeking to maintain or improve their wellness.
- Clear sections and minimalistic design enhance the user experience.
- Health assessments and monitoring tools keep users engaged.

E-commerce Web App (React, Redux, Tailwind CSS , API)

- Categories and product listings are well-organized, helping users find suitable options quickly.
- Offers a good selection of flowers and arrangements tailored to various occasions like birthdays, anniversaries, or celebrations.
- Beautiful images of floral arrangements create a welcoming and visually appealing environment.
- The ordering system is intuitive, allowing customers to add items to the cart, specify delivery details, and complete the purchase effortlessly.

WheelSearch – OCR-Based Number Plate Recognition (React Native + ML)

Project Type : Internal Project

- Built a mobile app that detects vehicle number plates using ML and regex.
- Enabled photo capture or upload, applied real-time OCR to extract plate numbers.
- Integrated regex-based filtering to accurately isolate valid Indian vehicle number formats from OCR results.
- Integrated geolocation mapping to log where the number plate was detected.
- Implemented a map view to display the exact geolocation where each plate was scanned, using React Native Maps and device GPS.
- Built with Vision Camera, ML Kit, Geolocation, React Native Maps.

Task Manager Web App (React + DnD, Chart.js)

Internal Practice Project

The Task Manager Website is a feature-rich web application designed to help users efficiently manage and track tasks. The project includes drag-and-drop functionality, multiple task sections (Reviewed, Completed, Pending, etc.) and a data-driven dashboard with visual graphs.

The application allows users to:

- Create, update, and delete tasks dynamically.
- Drag and drop tasks between different status sections.
- Visualize task progress through charts and graphs.
- Filter and sort tasks based on priority and status.
