CAREER OBJECTIVE

Dynamic and detail-oriented Frontend Developer with 2+ years of experience in building responsive, user-centric web and mobile applications using React, React Native, TypeScript, and modern UI frameworks like Tailwind CSS. Passionate about crafting clean, maintainable code and delivering seamless user experiences. Eager to contribute to innovative development teams, continuously learn emerging technologies, and solve real-world problems through scalable and high-performance solutions.

SKILL SUMMARY

- **Languages :** HTML, CSS, JavaScript, TypeScript
- **Frontend Frameworks/Libraries :** React.js, Next.js, React Native, Tailwind CSS, Bootstrap, GSAP, Material UI
- **Backend & Database :** Node.js, MongoDB, RESTful APIs
- **Tools & Platforms :** Git, GitHub, Visual Studio Code, Firebase, Vercel, Netlify
- **Hosting & Deployment :** Firebase Hosting, Vercel, Netlify
- **Version Control :** Git & GitHub
- **Other Skills :** Responsive Design, UI/UX Integration, Code Splitting, Authentication (Firebase, Auth0, JWT)

WORK EXPERIENCE

Software Developer

📍 **Atum Information Technologies Pune — Mar 2024 – Present**

- Contributed to the redesign of the company's main website, improving mobile responsiveness and UX.
- Integrated backend APIs into the frontend system for dynamic content updates and user workflows.
- Converted design mockups into functional web pages, ensuring a consistent and responsive user experience.
- Optimized site performance using lazy loading, code splitting, and image compression.
- Researched and shared insights on emerging web technologies and trends, contributing to team knowledge and project improvements.
- Applied authentication and authorization flows using Firebase / Auth0 / JWT.

Key Achievements:

- Boosted website performance score from 68 to 90+ on Lighthouse by implementing frontend best practices.
- Reduced image loading time by 50% through optimized assets and lazy loading techniques.
- Trained and Led junior interns in core React concepts and collaborative coding through structured code reviews.

Junior Software Developer

📍 **Bioclutch Scientific Pvt. Ltd Aurangabad — Mar 2023 – Feb 2024**

- Collaborated with senior developers to build user-friendly web interfaces using React and TypeScript.
- Merged RESTful APIs to dynamically render and update data within the app.
- Developed authentication flows using Firebase, Auth0, and JWT for secure login and role-based access.
- Translated Figma designs into responsive UI using Tailwind CSS and React components.
- Researched and presented new tech trends that improved team implementation efficiency.

Key Achievements:

- Delivered 3 production-ready modules ahead of schedule, reducing sprint cycle time by 15%.
- Improved page load speed by 35% through lazy loading and efficient API structuring.
- Received internal recognition for rapid prototyping and UI responsiveness in team demo day.

PROJECTS

🏥 Healthcare Web App

Tech: React, Tailwind CSS, Firebase
- Built a responsive health dashboard with adaptive layouts for desktop, tablet, and mobile.
- Synced Firebase for authentication and health data storage.
- Designed intuitive UI/UX with clear sections and minimalistic layout to improve usability.
- Enabled users to track and assess wellness through custom tools and visual insights.

🛒 E-commerce Web App

Tech: React, Redux, Tailwind CSS, REST APIs
- Developed a modern e-commerce platform with cart management, product filtering, and checkout features.
- Inserted APIs for product listing, user authentication, and order placement.
- Implemented responsive UI for mobile and desktop shopping experiences.
- Optimized performance using lazy loading, dynamic routing, and code splitting.

🚙 WheelSearch – OCR-Based Number Plate Recognition

Tech: React Native, Vision Camera, ML Kit, Geolocation
- Created a mobile app that detects and extracts Indian vehicle plate numbers using OCR and regex filtering.
- Embedded camera access for real-time image capture or upload.
- Connected ML Kit for text recognition and displayed results with mapped geolocation using React Native Maps.
- Stored and visualized scan history with timestamped locations.

✅ Task Manager Web App

Tech: React, DnD (Drag-and-Drop), Chart.js
- Built a task management tool with dynamic task creation, updating, and deletion.
- Enabled drag-and-drop task reordering across multiple columns (Pending, Reviewed, Completed, etc.).
- Added Chart.js for visual task analytics and progress tracking.
- Executed task filters, sort options, and priority tagging for improved productivity
