PROFESSIONAL SUMMARY

Frontend Engineer with 2+ years of experience building scalable, high-performance web and mobile applications using React, React Native, and Next.js. Proven expertise in performance optimization, API integration, and real-time systems. Experienced in developing AI-powered applications using OpenAI APIs, including chatbot and sentiment-based systems.

SKILLS

Languages

HTML5, CSS3, JavaScript, TypeScript

Backend & Database

Node.js, Express.js, MongoDB, Firebase

APIs & Real-time

REST APIs, Socket.IO, API Integration

Tools

Git, GitHub, VS Code, Vercel, Netlify

Frontend

React.js, React Native, Next.js, Tailwind CSS, Framer Motion, GSAP

AI & Integration

OpenAI API, Gemini API, AI Chatbot Development, Prompt Engineering

Core Concepts

Performance Optimization, Responsive Design, Authentication (JWT, Auth0), State Management (Redux), OCR (ML Kit), Scalable Applications

EXPERIENCE

Software Developer, Atum Information Technologies

03/2024 – Present

Pune

- Elevated the website's performance score from 68 to over 90 on Google Lighthouse by implementing advanced frontend optimizations, including lazy loading, image optimization, and code splitting.
- Slashed image loading times by 50% through strategic asset compression and lazy loading techniques.
- Engineered a comprehensive redesign of the main company website, focusing on a mobile-first approach to enhance user experience (UX).
- Transformed intricate Figma design mockups into pixel-perfect, interactive, and fully responsive web pages.
- Mentored and guided junior interns in core React concepts and collaborative coding practices through structured code reviews and pair programming sessions.

Junior Software Developer, Bioclutch Scientific Pvt. Ltd

03/2023 – 02/2024

Aurangabad

- Accelerated project timelines by delivering 3 production-ready application modules ahead of schedule.
- Reduced application page load time by 35% by refactoring code and architecting a more efficient API data-fetching structure.
- Architected and maintained intuitive user interfaces for complex scientific data platforms using React, TypeScript, and Tailwind CSS.

- Constructed secure authentication systems utilizing Firebase and JSON Web Tokens (JWT).
- Contributed to team efficiency by researching and promoting innovative front-end technologies and best practices.

PROJECTS

Vibernote – AI-Powered Chat App (React Native, Node.js, OpenAI, Socket.IO)

- Engineered a real-time chat application using React Native, Socket.IO, Node.js, and MongoDB
- Integrated OpenAI API for AI-driven responses, sentiment analysis, and contextual suggestions.
- Implemented voice-to-text, live summarization, and emotion tracking features.
- Designed scalable backend architecture with authentication and real-time messaging.

WheelSearch – OCR Plate Detection App (React Native, ML Kit)

- Developed a mobile app using React Native, ML Kit, and Vision Camera for real-time number plate detection
- Integrated OCR to extract and process vehicle numbers with high accuracy.
- Enabled geolocation-based tracking and history visualization of scanned data.

E-commerce Web App (React, Redux, REST APIs)

- Architected a full-featured e-commerce platform using React, Redux, and REST APIs.
- Applied product listing, cart management, and checkout workflow for 50+ products.
- Improved performance using lazy loading, code splitting, and optimized API calls .

Healthcare Web App (Next.js, Firebase)

- Built a responsive health tracking web app using Next.js, Tailwind CSS, and Firebase with secure authentication.
- Optimized performance to achieve sub-2s load time using lazy loading and code splitting.
- Implemented real-time data storage and visualization for tracking user wellness metrics.

Restaurant Web Application (React, TypeScript, Tailwind)

- Delivered a visually rich restaurant website using React, TypeScript, Tailwind CSS, and Framer Motion.
- Created interactive UI components for menu display, gallery, and brand storytelling.
- Improved user engagement through smooth animations and responsive design principles

Gym & Fitness Web Application (React, TypeScript, Framer Motion)

- Developed a fitness website using React, TypeScript, and Tailwind CSS to showcase programs and services
- Designed structured UI for training plans and membership flows to improve user conversion.
- Enhanced UX with responsive layouts, animations, and performance optimizations

CERTIFICATIONS

- React Native Mobile App Development By GFG 
- 50Days of DSA JavaScript Data Structures Algorithms LEETCODE By Udemy
- Generative AI and ChatGPT By GFG
- Data Structures & Algorithms in JavaScript by GFG

Education

B.A, YCMOU

08/2022 – 06/2025
